PROJECT FACT SHEET

East Point Shoreline Protection Project, NJ

September 2005

CONGRESSIONAL INFO: Sen. Corzine NJ, Sen. Lautenberg NJ, Rep. LoBiondo

ACTIVITY: Continuing Authorities **TYPE:** Emergency Shoreline Protection (Section 14)

AUTHORITY: Water Resources Development Act of 1992

PROJECT PHASE: Planning and Design Analysis

LOCATION: The study area is located in Maurice River Township, Cumberland County, New Jersey, approximately 20 miles north of Cape May, New Jersey.

PROJECT DESCRIPTION: The proposed study area is located on the tidal Delaware Bay in Maurice River Township, Cumberland County, New Jersey. Bay Avenue is the only access to the 19 residences of East Point. A portion of the road is being eroded by wave action and during storm events, the bay water overtops the small dune, which is approximately 3 feet high and Bay Avenue becomes impassable. Without providing some type of protection, continued erosion and road failure from reoccurring coastal storms is anticipated within 5 years.

PROJECT STATUS: Planning and Design Analysis (PDA) phase is underway and an Environmental Assessment is being coordinated. Plans and Specifications scheduled for completion in FY2005.

FINANCIAL DATA:

(\$000)

PRP	\$ 10
Planning and Design	\$ 286
Construction	\$ TBD

BUDGET DATA:

(\$000)

FY 03:	\$106
FY04:	\$30
FY05:	\$67

*Funding is 100 percent federal for Planning and Design Analysis Phase with non-federal reimbursement of 35 percent in the Construction phase.

SPONSOR: Maurice River Township, Cumberland County, New Jersey

CRITICAL ISSUES: None

PROJECT MANAGER: Don Martinelli
